PLANMECA

Revolutionary connectivity for unparalleled efficiency

*Our **Planmeca Romexis® Clinic Management** software module is a solution no other manufacturer can offer. Planmeca digital dental equipment can easily be connected to a network to generate valuable data and enable attractive new services for efficiency and quality assurance purposes.*

Planmeca Romexis® Clinic Management helps dental clinics measure efficiency, maximise patient flow and optimise capacity by providing real-time information and monitoring of Planmeca equipment usage and events. The software module collects data on all digital Planmeca equipment usage – acting as a cutting-edge tool for managing clinic operations.

Planmeca Romexis Clinic Management supports all digital Planmeca dental units, all **Planmeca ProMax® 2D** and **3D** X-ray units and the **Planmeca PlanMill® 40** milling unit.

NETWORK

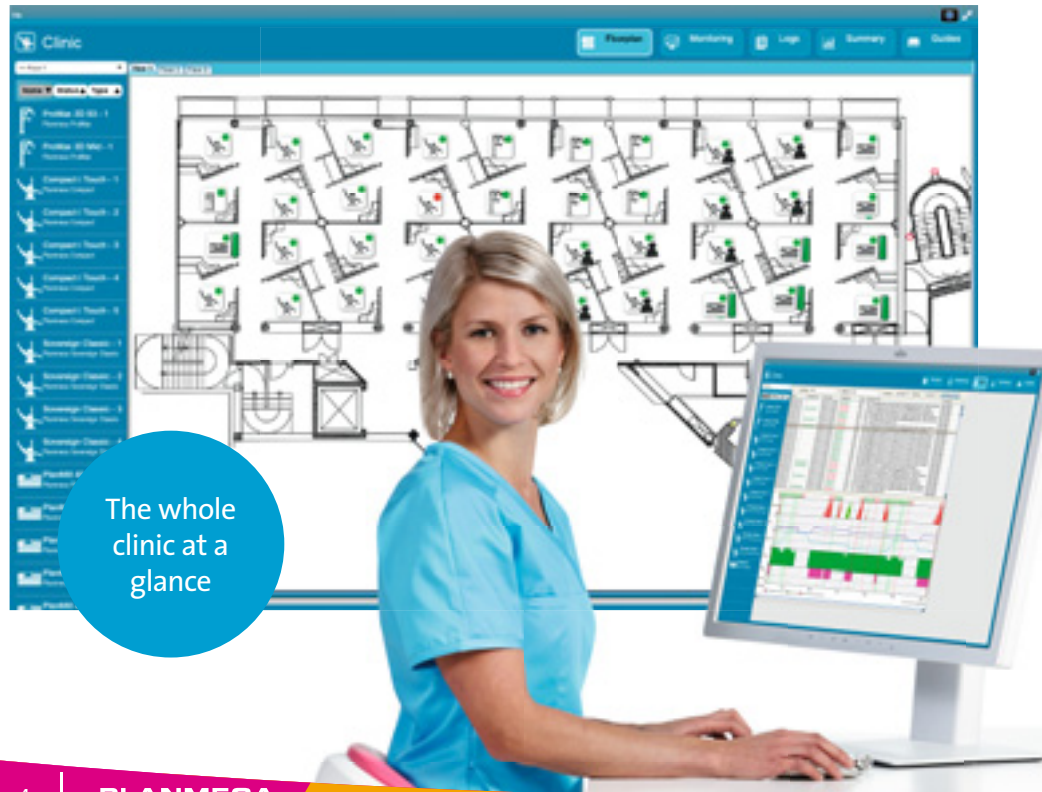

Great benefits for different user groups

Planmeca Romexis® Clinic Management offers unique benefits and services to all different users at a clinic. The module's networking capabilities and equipment connectivity offer flexible adaptability to individual users, as well as optimum efficiency due to its centralised and remote monitoring features.

Benefits for multi-site practices

- Possibility to utilise a centralised database – all data easily and immediately available at all sites.
- Monitor your clinic's status with all networked devices visible in one easy-to-read graphical overview.
- Access accurate, real-time information on all dental unit, X-ray device and milling unit operations.
- Improve overall efficiency and quality assurance – plan operations based on actual usage.
- Achieve significant time and cost-savings by utilising remote software updates.
- Increase efficiency and flexibility by using our software on mobile devices.

The whole clinic at a glance

Benefits for clinical staff

- All personal chair and instrument settings are immediately available at all locations.
- Store individual chair positions and instrument presets for an unlimited number of dental unit users.
- Achieve a more fluent and flexible workflow by remotely monitoring milling work progress and receiving automatic notifications of work completion.
- Integrated quick guides supporting device use are always available.

Benefits for maintenance and infection control

- Conveniently monitor device usage remotely and generate reports.
- Minimise any possible downtime with real-time user-assistance.
- Troubleshooting is fast and easy – information on real-time usage and device history is always available.
- Plan and optimise preventive maintenance according to actual usage.
- Audit trail and quality-assurance of infection control procedures using built-in reporting for patient and staff safety.

Monitor dental unit usage like never before

The automatically generated data from Planmeca dental units enables ultimate efficiency and the highest quality of patient care. Smooth operation is guaranteed, as real-time information on dental units and their status is always readily available. This helps to locate and optimise available resources, and also provides the technical staff with the tools to thoroughly monitor the entire clinic with actual data.

Audit trail for quality assurance and operation planning

- Usage rates of dental units can be used for operation optimisation and investment planning.
- Unique patient recognition system for monitoring of patient chair time ensures ultimate clinic efficiency
- All infection control cycles can be viewed and reported for quality assurance.
- Generate valuable data for clinic management and optimisation purposes.

Service based on actual usage

- Perform preventive maintenance based on actual usage to avoid any downtime. It is possible to set usage time limits with automatic notifications and alerts.
- Troubleshooting is easy with a reliable event and error history available. It can also be done remotely.
- See all information of performed service visits in one place.

Support for users

- Personal dental unit settings are stored to **Planmeca Romexis®** and can be accessed from any dental unit at your clinic.
- Remote monitoring of dental unit usage allows real-time user assistance.
- Integrated quick guides to **Planmeca Sovereign®**, **Planmeca Sovereign® Classic** and **Planmeca Compact™ i** usage, as well as infection control and maintenance are always available.

Access to unique X-ray device data

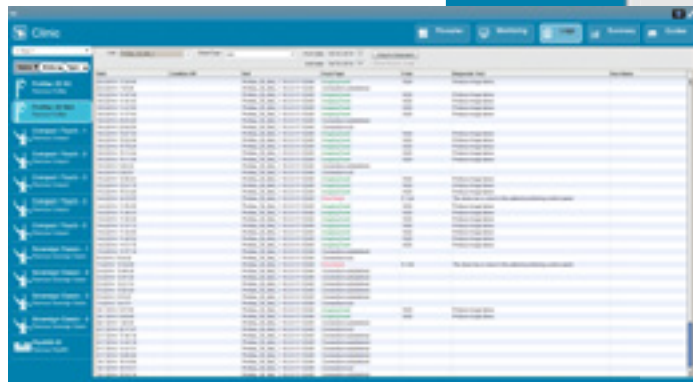

Our **Planmeca Romexis® Clinic Management** solution generates unmatched device data directly from our **Planmeca ProMax® 2D and 3D** imaging units for quality and clinic efficiency planning purposes.

Valuable and reliable data for decision making

- Utilise mileage reports to attain reliable information of the number and type of taken X-ray images.
- Compare the data from different **Planmeca ProMax®** X-ray units at your clinic and use it for reporting, improving clinic efficiency and planning new investments.

Practical tool for service

- Easily stay on top of clinic operations with real-time information of all your Planmeca ProMax X-ray units and their status information.
- Detailed equipment information like software versions and calibration dates together with a detailed history log provide a basis for high-quality service and patient care.

Superior milling efficiency

Planmeca provides an optimal CAD/CAM workflow by enabling users to fully utilise available resources. Our unique network solution provides remote real-time usage information on all **Planmeca PlanMill® 40** milling units. Always have instant access to remote mill status information to achieve the best possible efficiency at your clinic.

Optimise your workflow

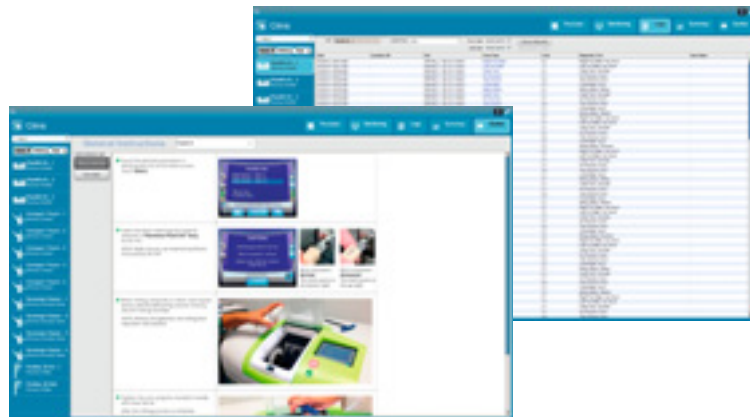

- See the estimated completion time and optimise your workflow by remotely monitoring ongoing milling processes.
- Maximally benefit from having several **Planmeca PlanMill® 40** milling units at your clinic – monitor the status and capacity of all milling units to see which unit is available for the next task.

Facilitate proactive maintenance

- Easily plan proactive maintenance based on information on tool and water tank statuses, as well as the number and type of finished tasks.

Maximise productivity and profitability

- Calculate the revenue and payback times for milling units based on their actual degree of usage, as information of the number and type of finished tasks is available for every milling unit at a clinic.

Explore the unique possibilities of Planmeca Romexis® Clinic Management

Planmeca Romexis® Clinic Management is an innovative way to link dental equipment and software – making a completely new quality standard in digital dentistry possible.
